

25/35mm gas/air valve lockout

FEATURES

- Lockout system for valves with no operating accessory (wheels, levers, valve keys, etc.) that are not easy to block using other lockout devices.
- Suitable for valves in which the connection for operating accessories is between 25 to 35mm.
- Made from high-resistance resins ready to withstand extreme temperatures, corrosion, chemical agents and UV rays.
- Compact and easy-to-use.
- Lockable with a single padlock with shackle diameter up to 9mm..
